Question 12

Complete

Marked out of 25.0

The idea of data creating business value is not new, however, the effective and appropriate use of data from data collection through to publishing is becoming problematic.
Explain privacy and quality considerations concerning data publishing/sharing.

This will be marked off-line.

1. The dataset must from an open data source. No copyright limitation. It is one major privacy concerns during the ideation phase of any business.
2. Do not send data collections which be used in the company to others. It can have data quality issues.
3. Using datasets with copyright must get permission from the writer. Else one could not use datasets.
